

Digital Solar Investments

Become a Partner

Our Mission

CloudSolar is Barbados' 1st GreenTech Company that seeks to democratize the development and deployment of solar in Barbados

Community Solar Projects

Our company is democratizing the way solar investments are made in Barbados and the region through the use of our digital solar platform.

We are enabling our customers to own their slice of a solar PV system in our large scale and efficiently managed solar farms.

The Problems Facing Solar Energy Deployment

High Cost Installations

Smaller installations carry a high startup cost and expensive maintenance and insurance

Shortage of Opportunities

Opportunities for business and growth of capital is hard to come by in this market

Credit Risk Aversion

Banks are more risk-averse in terms of lending for renewable energy with clients

Barriers to Entry

The need for a suitable roof, free from shading and with a suitable pitch and orientation can be a deterrent to install solar

Changing Climate

The changing climate of the world has spawned the need to innovate how fast we deploy renewables

The Solution - Digital Solar Investments

Leveraging our size and scale for the benefit of all

Technology

With technology we will increase the adoption rates of solar by breaking down barriers through our digital and innovative platform

Democratize

We will allow all members of society to have access to solar power distributed in our remotely installed installations

Grow

We will grow our solar asset base to include more users to come on board and participate through our network of solar

Become a Roof Partner

Turn-Key Systems

Insurance, efficient operations and maintenance are the backbone to our online offering

Fully Financed Build

We will buy an entire solar system for your roof, which we finance and pay off with the solar earnings

A Network of Solar

All our installations' energy is pooled together for all to benefit from equally

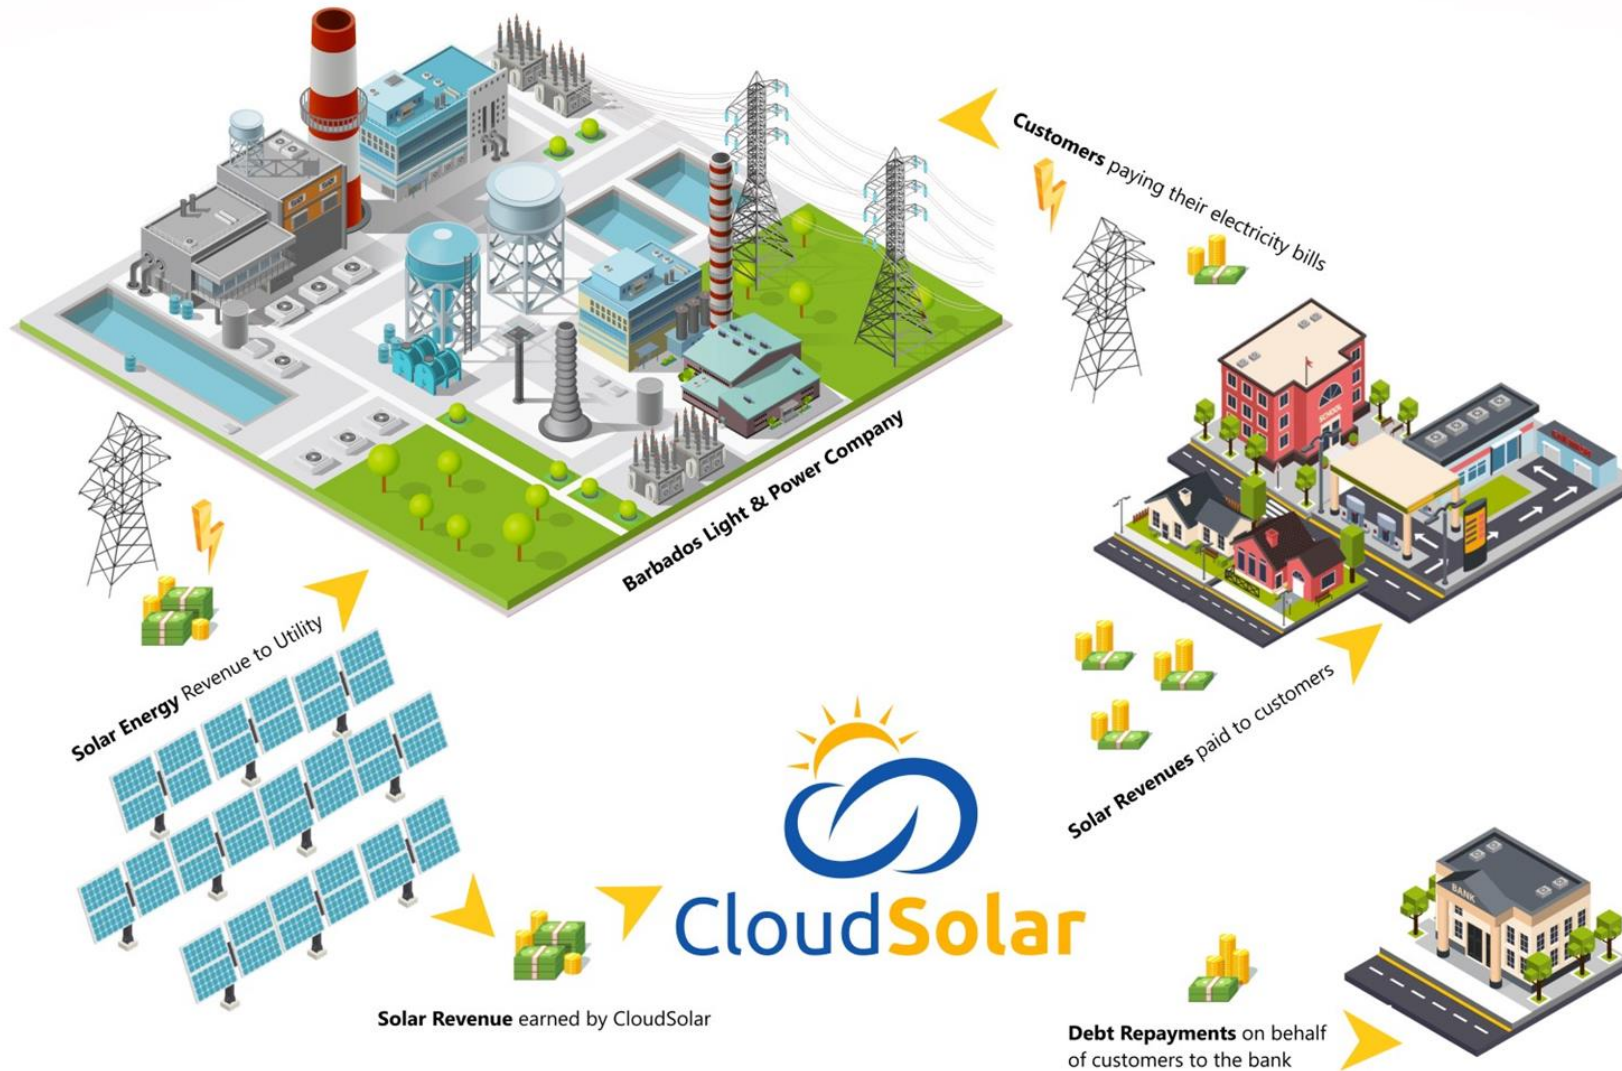

So Many More Benefits

There are many benefits to being a part of a pool of solar. **CloudSolar** looks out for everyone's interest who purchases in the pool. We will purchase and install a system on a partner's roof and pay for the system with the energy credits.

No Roof/Land Required	✓	✗
All Operations & Maintenance Included	✓	✗
All Insurance Included	✓	✗
All Replacement Parts Included	✓	✗
Zero Downtime because of solar pooling	✓	✗
Your Best Costing Installation	✓	✗
Fully Financed & Turnkey	✓	✗

The Business Cycle

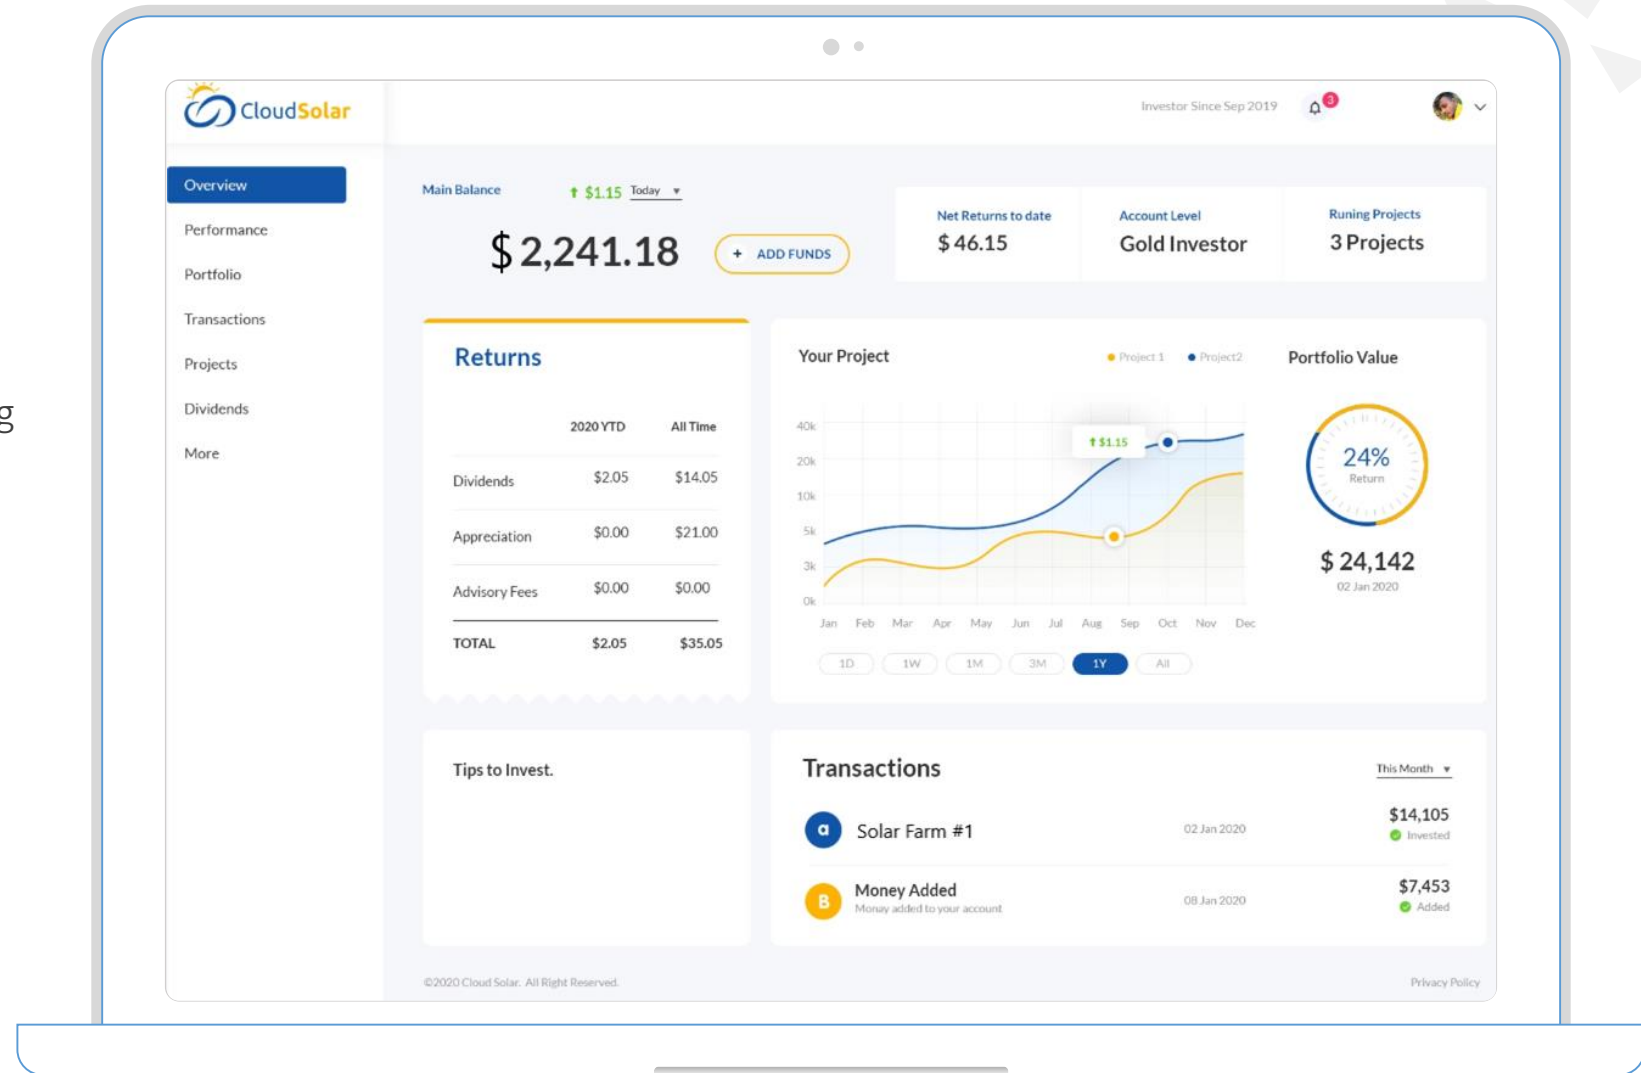

The Digital Platform

Solar Power for everyone living anywhere – no roof required

Other benefits include:

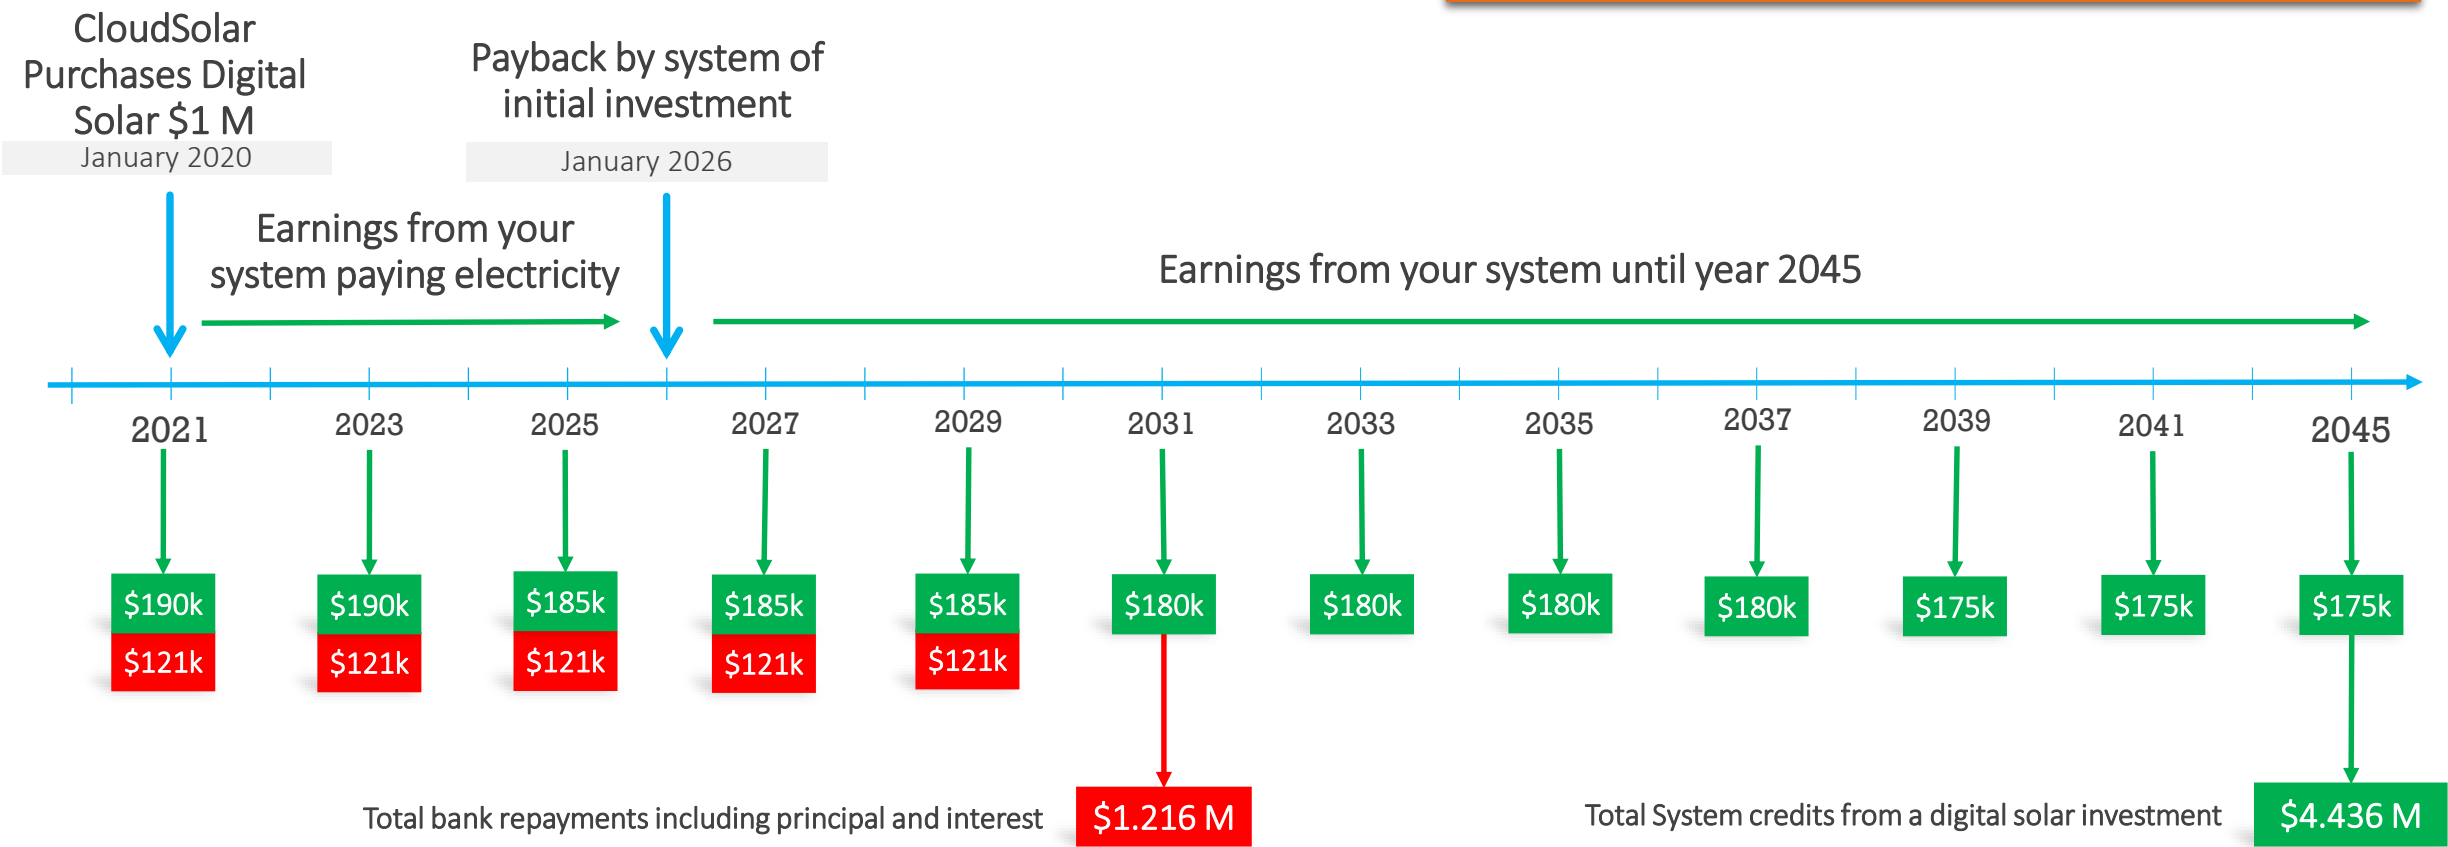

- Removal of all barriers to owning solar
- Lowest cost installations
- No roof required
- No land required
- Insurance covered
- Maintenance covered
- Operations included
- A turn-key solution

Fund A Solar System

25 Years of Solar Earnings self financing

For the Finance Gurus
18% Return on Capital Invested
Structural repairs included & 5% interest for 10 years

*Client continues to pay their 25 years of electricity bills

A Growing Solar Pool

7 Megawatts

- Solar Power we are dedicated to install over the next 2 years
- We plan to grow our pool of solar to over 7 Megawatts by December 2021
- We plan to do this by empowering all of our stakeholders to own digital solar through our large network of roof space
- We also are empowering persons through our ground mount installations projected to be installed by 2021.

Questions to ask yourself

- Do you have cash that is sitting down earning 0% under mattress or in the bank?
- Do you have a roof that is earning \$0?
- Do you have a roof larger than 10,000 sq. ft.
- Wouldn't you like to buy something now to offset 100% of your electricity bills?
- Wouldn't you like a full financed turn-key solution to do this, with no management on your part?

Summary

The Future of Solar Investments

- Digital solar investments allow for the democratization of energy in Barbados
- In order to pursue large ground mount installations, the Prime Minister has asked that these installations be offered as a community investment which can benefit the masses
- Remotely installed systems that generate in a pool benefit all users who are part of the network
- Our product is catered to the customer who would never have seen the opportunity to own a solar system because of the various barriers to entry – such as owning a house with a roof
- All operations, maintenance and insurance are covered by the pool so that our customers never have to worry about the performance
- We centralize and purchase all our installations to guarantee the best pricing for all our participants
